**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/27/04 has been entered.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Takizawa et al. (US6573964B1).

In regard to claims 1 and 7, Takizawa et al. teach (Figs. 1, 3 and 6) a pixel structure for a liquid crystal display comprising

Art Unit: 2871

- a first substrate (upper substrate), with respect to a pixel, having a W-like extruding structure 11 composed of two V-like structures formed on a surface of the first substrate; which is respect to a top view of the first substrate;
- a second substrate (lower substrate), parallel to the first substrate, having a plurality of openings (split 20 formed on pixel electrode 1), wherein the openings are aligned along a direction from a tip of the V-like structures to an edge of the pixel structure and vertical to a long edge of the baguette pixel structure as shown in Fig. 6;
- a liquid crystal layer 22 located between the first substrate and the second substrate,

wherein

- the first substrate and the second substrate produce a multi-domain vertical alignment structure in the liquid crystal layer (col. 1 lines 11-16);
- the W-like extruding structure abuts (touches) the liquid crystal layer as Fig. 3 shown.

Claims 2 and 8:

- a shape of the openings comprises an isosceles triangle, and sides of the isosceles triangle are parallel to sides of the V-like structure as Fig. 6 shown.

Claim 3:

- the aligned direction of the openings is parallel to the central line of the V-like structure as Fig. 6 shown.

Art Unit: 2871

Claim 4-5:

- The shape of pixel structure is baguette (quadrate).

Claim 6:

- the V-like structure has a tip angle of 90 degrees as Fig 6 shown.
